

# Summer Pasture Walk

**May 13, 2021**

**5:00 pm – 8:30 pm**

Swallow Hill Farm

14148 Stonewall Jackson Road, Woodford, VA 22580

Everyone is invited to attend and learn how Tim Tobin developed a rotational grazing system and is using a diversity of forages to manage for year-round grazing and improved cattle performance.

- Overview and background of farm operation
  - brief history and overview of farm and grazing system development
- Partnering with local conservation services for technical and financial assistance
  - Hanover-Caroline Soil and Water Conservation District
  - USDA -Natural Resources Conservation Service
- Using native warm season perennial grasses for forage and grazing
  - pasture preparation and pre-season weed control
  - establishment, competition control, and first season management
  - grazing management, cattle performance, and wildlife habitat
- Renovating and improving cool-season grasses pastures
  - renovating to novel endophyte tall fescue
  - interseeding high quality forages into established sods
  - utilizing annual forages for improved animal performance
- Important aspects of seed drill setup for successful forage establishment or pasture renovation
- VFGC and the National Grazing Lands Coalition (NatGLC)
